DEVELOPER

PROFILE

Highly organized and proactive professional with proven experience in cross functional team coordination, structured tracking, documentation and stakeholder communication. Former Excelerate intern with direct knowledge of the program's workflows and expectations. Full-Stack Developer and emerging AI/ML Engineer bringing a systematic, detail driven approach to every task, whether managing onboarding pipelines, maintaining performance trackers or supporting team operations across multiple projects.

Experience

Digital Strategy Associate

Excelerate Intern | Saint Louis University 2025-2026

Collaborated across cross functional teams to plan and execute digital initiatives, ensuring alignment of activities and timely delivery of project milestones.

Prepared structured reports, presentations and data driven insights to support leadership decision making and track program performance.

Coordinated team communications, maintained documentation, and contributed to a structured and efficient team environment throughout the program.

Flutter Mobile app

Excelerate Intern | Saint Louis University 2025-2026

Built Badges, Certificates & Edit Profile screens for team Flutter app.

Implemented JSON data, navigation, form validation and error handling.

Web Developer

Nobel Internship | 2025-2026

Led frontend development and cross-device compatibility, coordinating with team members to align project tasks and ensure timely execution.

Built and maintained frontend components with clean, maintainable code using JavaScript, React, HTML5, and CSS3

Supported backend development using PHP, Python, and MySQL to implement features end to end
Debugged UI issues and refined existing codebases to improve usability and performance

AI Software Engineer

iMerit Scholars · Part-time · Remote

Evaluate AI-generated image pairs for quality, assessing adherence to text prompts and visual accuracy.

Education

Institute of Software Technologies

Software Development | 2025 – 2027

Moringa School

AI, Machine Learning & Large Language Models | 2025 – 2026

RELEVANT PROJECTS

Portfolio Website — Full Stack with AI Integration

Developed a responsive personal portfolio demonstrating component-based frontend architecture, backend integration, and code optimization. Built with React, Node.js, and PostgreSQL.

Cross-Device Web Applications

Built multiple web interfaces with a focus on usability, accessibility, and cross-device compatibility using modern JavaScript and responsive design principles.

Mobile Learning App (Flutter)

Collaborated with team members at Excelerate to develop innovative mobile learning applications, contributing to both UI and feature implementation using Flutter.
